

MONDAY HERO - HIRING! FULL STACK DEVELOPER (MOBILE TECHNOLOGIES)

Monday Hero is a startup focus on mobile technologies and developer tools. (<https://mondayhero.io>) We're looking for teammates for **Istanbul** office.

At Monday Hero, we develop a platform/developer tool that helps developers & software companies to build their mobile apps faster and easier. We're working as a cross functional product team, love to create features in an agile way and to be engage with our customers in real time and analyze metrics that actually matter.

If you are a person who can easily identify business needs, think simple, get things done within a great team of collaborators join us!

Responsibilities:

- You have great work ethic.
- You enjoy creating solid and maintainable code so you won't hate yourself the next time you work on it.
- You are able to quickly analyze bugs and usability issues and provide solutions for them.
- You are excited about new technologies.
- You are eager to code on several programming languages, especially Flutter and Swift.
- You are excited about code generation and automating repetitive tasks.
- You are comfortable with implementing technologies you've never implemented before.
- You love to write technical blogs about new technologies, share the knowledge with mobile developer community.

Qualifications:

- At least 1-2 years of development on **Flutter**, **React Native** or **Node.js**
- Comfortable with one of the technologies above or eager to learn others.
- Experience in layout systems and UI components.
- Able to communicate in English.
- Comfortable with **SDLC tools, Git**.
- **Nice to Have:** Experience in Swift.
- **Nice to Have:** Experience in UI testing.
- **Nice to Have:** Experience in Mongo DB, Postman.
- **Nice to Have:** Experience in Scrum methodology.
