

İŞ İLANI / JOB AD

Looking for junior, mid-level or senior computer engineers that have experience (other than homework with exception of final project) with one or more Technologies below:

- C, C++
- C#
- Asp.net MVC
- .net Core
- Win API, Windows Services
- JQuery
- Html, CSS
- MS-SQL
- Other Front-end Technologies

GitHub profile welcomed if exists.

If you believe you can have easy transition from Java to C#.Net, Knowledge of java is also welcomed

Candidates will be working on new projects as well as maintaining existing in-house products or customer projects.

Depending on knowledge level, part-remote working is an option, while on site location is on YTU-Teknopark.

Student (not graduated) applications welcomed only if there are no more than few course lefts including final Project. Application accepted only if we convinced that job work will not be interfere graduate efforts.

What we concern most is that having deep curiosity of how Technologies works under the hood and spending time on learning how they work bottom to top as a part of your engineering hobby.

Candidate should be open to learn new things and Technologies in a way described above.
